

## Rasikh Khalil Pasha

[rasikhonly@gmail.com](mailto:rasikhonly@gmail.com) • [rasikhkhalilpasha.com](https://rasikhkhalilpasha.com) • 088279365062

As a dedicated Informatics Engineering student, I specialize in front-end development using React and Next.js. I'm passionate about expanding my skills in backend development with PHP and Node.js, while also exploring Android app development. Future goals include mastering Flutter to broaden my mobile development expertise. I am driven by the vast opportunities in the technology industry and committed to continuous learning and growth.

## Education

### Universitas Negeri Semarang

Bachelor of Computer Science  
GPA 3.66 (to date)

July 2021 - July 2025 (expected)

### MAN Insan Cendekia Kota Batam

High School in Science and Math

July 2018 - July 2021

Bintan, Kepulauan Riau

June 2022 - August 2022

- Assisted senior staff in addressing various IT-related issues
- Repaired hardware such as PCs and printers
- Provided technical support to employees
- Performed installation and configuration of operating systems

### CV. Kalingga Keling Jati

Front End Developer Intern

Jepara, Jawa Tengah

August 2023 - December 2023

- Developed an ERP website with the team
- Designed and developed the user interface using Tailwind CSS and Alpine JS
- Give support to backend team with Laravel framework

### PT. Bintang Resort Cakrawala

IT Intern

Bintan, Kepulauan Riau

June 2024 - July 2024

- Developed a Computer-Based Test (CBT) website for the company's scholarship test exam
- Used CodeIgniter, Bootstrap, JQuery, and MySQL for the website development

## Projects

- 
1. ERP website for CV. Kalingga Keling Jati
    - Website to manage the company's internal operations. Key features included sales, purchasing, manufacturing, quotations, warehouse management, finance, and attendance tracking.
    - Techstack: Laravel, MySQL, Tailwind CSS, and Alpine JS
    - Repository: <https://github.com/waniAEbro/kalingga>
    - Demo: <http://kalinggakelingjati.site/> (email: [admin@kalingga.com](mailto:admin@kalingga.com), password: password)
  2. CBT website for PT. Bintan Resort Cakrawala
    - Website for administering text-based exams as part of the company's scholarship program.
    - Techstack: CodeIgniter, Bootstrap, JQuery, MySQL
    - Repository: <https://github.com/Rasikhkp/cbt-website>
    - Demo: Not yet
  3. Personal portfolio website
    - A website designed to showcase my skills and projects.
    - Techstack: Typescript, React JS, GSAP, and Tailwind CSS
    - Repository: <https://github.com/Rasikhkp/portfolio>
    - Demo: <https://www.rasikhkhalilpasha.com>
  4. Health Care Appointment Website - CarePulse (Case Study)
    - CarePulse is a website for managing doctor appointments. Features include:
      - Patients can easily schedule appointments via the website.
      - Administrators can manage and adjust appointments, including cancellations.
      - Users receive automated SMS updates for appointment confirmations and changes.
    - Techstack: Typescript, Next JS, Appwrite
    - Repository: <https://github.com/Rasikhkp/carepulse>
    - Demo: Not yet
  5. Budget Tracker Website - Cashzzle
    - Cashzzle is my original budget tracker website. Features include:
      - Daily transaction management with full CRUD capabilities
      - Insightful charts for comprehensive financial statistics
      - Seamless interactivity powered by Redux, with background processing for all backend requests
      - A minimalist design utilizing the Shaden component library
    - Techstack: Typescript, Next JS, Redux Toolkit, MongoDB, Tailwind CSS, Shaden library
    - Repository: <https://github.com/Rasikhkp/Cashzzle-frontend>
    - Demo: <https://cashzzle.vercel.app>
  6. Blog website - Kaizen (Case Study)
    - Kaizen is a blog website focused on environmental topics. Features include:
      - Blog reading capabilities
      - User options to create posts or save drafts
      - A Medium-like user interface for a familiar and intuitive experience
      - A rich text editor powered by Quill.js for creating and editing content
    - Techstack: Typescript, Next JS, Redux Toolkit, MongoDB, Tailwind CSS, Quill.js
    - Repository: <https://github.com/Rasikhkp/Kaizen>
    - Demo: <https://nkey.vercel.app>
